## **Level of registrations for LogiMAT 2011 sends positive signal**

One month before the end of the early-booking discount offered by the Munich-based organiser EUROEXPO Messe- und Kongress-GmbH to motivate regular exhibitors to get their registrations in early, the figures are looking good. Already, registrations for the next LogiMAT, which takes place from 8 to 10 February 2011 at the New Stuttgart Trade Fair Centre, have almost reached the high level achieved in 2008. Key customers have given firm commitments to exhibit here again: "For us this shows clearly that there is movement in the market again, and that the wait-and-see approach in the wake of the economic situation in 2009 seems now to be lifting," said LogiMAT Exhibition Director Peter Kazander.

In mid May the LogiMAT Advisory Board, composed of representatives from industry and science and research, will be coming together again to discuss trends and themes in the sector and to finalise the accompanying programme of lectures, forums and live events. This programme is a big attraction at the trade fair, and it has played a significant part in LogiMAT becoming what is today the largest annual gathering of the intralogistics sector in Europe. "We will again be offering exciting themes, perfectly in tune with the latest demands of the market. And the forum spaces will be positioned so that straight after the lectures visitors will be able to go direct to the relevant exhibitors, at the nearby stands, and discuss their specific issues further," said Peter Kazander. "With a return to interest in investment, the onus is now on the suppliers to respond, and to enthuse those decision-makers."

In the coming year, too, the goal of the international trade fair LogiMAT is not only to showcase the innovations capability of the sector, but above all also to highlight solutions for the specific challenges faced in day-to-day business.

**Main sections:** Materials handling and storage technology, warehousing and operational equipment, robotics, packaging solutions and systems, loading technology and handling, waste disposal, ground conveyors and ancillary equipment for stackers, information and communication technology, commissioning systems, labelling and identification, software and logistics facilities.

**Exhibition area:** 52,000 m<sup>2</sup>, Halls 1, 3, 5 and 7

**Duration:** 3 days

**Venue:** New Stuttgart Trade Fair Centre

**Internet:** [www.logimat-messe.de](http://www.logimat-messe.de)

**Exhibitors, LogiMAT 2010:** 762 from 23 countries
